CORE SKILLS

- | | |
|--------------|-------------------|
| - Flutter | - Dio |
| - Dart | - Firebase |
| - Cubit | - Git & GitHub |
| - MVVM | - Material Design |
| - Clean Arch | - Responsive UI |
| - REST APIs | - Local Alerts |

EDUCATION

B.Sc. Computers & Information
Zagazig University
2022 - 2026

Abdelrahman Mohamed Salah Eldin

FLUTTER DEVELOPER

SUMMARY

Dedicated and results-oriented Flutter Developer with practical experience in building clean, responsive, and high-performance cross-platform mobile applications. Specialized in structuring clean architectures (MVVM, Clean Architecture) and reactive state management (Cubit). Experienced in integrating third-party REST APIs and Google Firebase services. Adaptable team player comfortable working inside collaborative sprints or delivering standalone freelance solutions.

EXPERIENCE

Graduation Project -- MediMate 2026
Flutter Developer | Firebase

Developed MediMate, a smart medication management application featuring scheduled alarms with local offline notifications, Firebase Cloud Firestore/Auth integration, family profiles, inventory tracking, and clean MVVM & Cubit architecture.

Flutter Mobile App Development Program (120 Hours) 2026
National Telecommunication Institute (NTI)

Completed intensive training focusing on Flutter/Dart, Firebase backend systems, REST APIs integration, Cubit state management, MVVM, Clean Architecture, Git/GitHub, and responsive UI development.

Flutter Development Course 2024
Udemy -- Instructor Tharwat Samy

Completed self-paced online training covering Dart programming, object-oriented concepts, and clean widget architecture. Built foundational apps while practicing Cubit state management, responsive layouts, and API networking.

Personal Flutter Projects 2025 - PRESENT
Flutter Developer

Designed and built multiple mobile apps (MediMate, E-Commerce, Weather forecast clients, ToDo organizers) to master offline database caching, reactive state flows, API connections, and performance optimization.

Freelance Experience 2026
Kafiil & Nafezly Platforms

Completed custom paid Flutter tasks for remote clients, including UI improvements, bug fixing, feature enhancements, responsive layout adjustments, and code maintenance.

Continuous Learning 2024 - PRESENT
Flutter & Dart Ecosystems

Consistently upgrading technical skills through documentation research, articles, and courses covering mobile performance optimization, design patterns, and clean code.
